Dear Parent/Carer,

## MATHS ONLINE WORKSHOP

We're thrilled to announce an exciting development in our ongoing efforts to support your child's maths learning at home. Members of our Maths Team across Abbey Academies Trust have come together to create a fantastic online maths video, designed to showcase the key features available on our website and those we partner with to enhance maths learning at home.

In this video, we will highlight the various resources, tools, and interactive features our website offers to supplement your child's maths education. From fun and educational games to video tutorials and printable worksheets, our aim is to make learning maths an enjoyable and enriching experience for your child, even outside the classroom.

To access this valuable resource, please visit the following YouTube link:

<https://www.youtube.com/watch?v=TSjmpl7ALkQ>

An example of the resources available, which will be discussed further in the workshop, is the 'Maths with Michael' suite of videos. The videos are available on the White Rose Maths website; <https://whiterosemaths.com/maths-with-michael#watch> We encourage you to explore these videos with your child as they will reinforce what they are learning in school and give you an opportunity to discuss maths concepts together.

Here are some reasons why the videos are beneficial for you and your children:

- They explain maths concepts clearly, making sure your child understands the basics
- They follow the White Rose Maths curriculum, which means they cover the same topics your child is studying in school
- By watching them, your child will reinforce what they are learning in the classroom, boosting their understanding and confidence in maths
- They cover topics such as Place Value, Subtraction, Multiplication, Division, Fractions, and Algebra. There is also a helpful parent/carers guide with resources for each video

Additionally, the website provides extra workbook resources that you can download to further reinforce your child's understanding. You can find them on this link:

<https://whiterosemaths.com/parent-resources#download>

We understand the importance of a supportive home environment for your child's academic success, and this initiative is part of our commitment to provide accessible resources that complement our in-school curriculum. We encourage you to explore the video and take advantage of the diverse array of tools available.

We hope that these help you with working alongside your children with their mathematics work. Should you have any questions about the resources, please do not hesitate to contact your child's class teacher.

Your sincerely

The Maths Team
